RKDAN- MILITIMY

Los Angeles, California July 20, 1968

Jun J. Epperson

Dear Isabel:

The enclosed material more or less speaks for itself. The envelope in which I received it was addressed:

NICAP L.A. Subcommittee 403 No. Ardmore Ave., Los Angeles, Calif. 90004

His name and address was in the upper left corner of envelope. I wrote him a letter by return mail thanking him for the log type entries of UFO incidents that occurred at Vandenberg A.F.B. during the latter part of 1967 and also thanked him for his Resume. Since he did not ask for anonymity I asked if NICAP could use his name. I judged from the attitude in his note that he expected us to do anything with it we wanted (but still I thought) it might be best if we had his permission in writing.) I cordially invited him to come to Los Angeles at his earliest convenience and meet with our subcommittee.

Do you have other NICAP members in or near Lompoc, Calif.? He seems eager to meet them. We feel that we should cooperate with him to the fullest. We feel this material he has given us is extremely important to NICAP. Also important if we get an open Congressional hearing.

I have not received an answer to my letter as yet. Perhaps he went on vacation. Think if I do not hear from him in a couple weeks or so that I will telephone him.

Am sending you the original material which we received. We made copies for our files.

Dr. Robert Nathan told me about these "incidents" last fall and said that he went with Robert Low up to Vandenberg A.F.B to investigate. Said that they were "going crazy" at Vandenberg; that no one knew what the lights were, et But he and Bob Low didn't find out anything and that they were told it was all caused by "birds." Dr. Nathan was very disgusted (and didn't believe it for a minute). As I said, Dr. Nathan told me about it at that time.

So we believe that these log type entries which have been sent to us are not only mighty interesting - but vitally important. (I have not as yet mentioned receiving all this to Dr. Nathan.) I would also like to send copy to Dr. McDonald. What are your thoughts about this?

One important thing that we don't know as yet is <u>WHO</u> came to the conclusion that the sightings were "birds" -- was it the military authorities at Vandenberg -- or the Gondon Committee ??? Somewhere I heard that it was the Condon committee - but cannot for the life of me remember where I heard it.

Isabel, thank you for the NICAP information sheets and the extra copies of the Investigator. And for your very nice letter of July 8, which I will answer soon. I enjoyed it very much.

Very best wishes to all at NICAP.

Sincerely,

Sdabel

NICAL

IRA F. M. ZEEMAN 900 W. DATE STREET LOMPOC, CALIFORNIA Sis - You J. Experson Enclosed you will find Log type entrés of U.F.O. incidents That occurred here at Vanden being A.F.B. during the latter part of 1967. Have the sightings here at VAFB during that perviet been brought to your attention previously? also enclosed is a copy of my resume, to give you an idea of my background. I am an associate member of MICAP, and

would like to meet other members in my vicinity. If possible, please send names & addresses of other members in the area.

Bleave inform me if there is any way that I may contailute to MICAP'S effort

JUL 2 2 1968

The October 6 sighting of Unidentified ying Objects (UFOs) by Vandenberg dar units promoted sufficient interts lo cause a 7-member scientific im to spend two days here investigatr the creports, it was learned today. The scientists, headed by Robert Low, e acting under an Air Force - Unirsity of Colorado contract let specifilly to the university to conduct investations into UFO reports. Team memers include representatives of the Coloido school, Stanford's Research Instite, the New Mexico Institute of Mining and Technology and the Environmental Services Administration ciences ESSA).

The scientists arrived here yesteray and departed this morning. Results if their findings were not immediately vailable and will have to be made pubc by the University of Colorado or the ecretary of the Air Force, base offiials said.

The October 6 incident, attributed to an nusual phenomena appearing on radar racking devices being manned by vetran operators, culminated with the crambling of Air Defense Commandets from Oxnard AFB. To date it has to been made public whether or not the ilots were able to locate the UFOs.

A board of officers was appointed at andenberg to investigate the sighting eports and officials of the Secretary of the Air Force's office in Washington

LOMPOC RECORD

FRI. NOV. 3, 1967 LOMPOC, CALIF. said later that the sightings may have been caused by conditions of temperature inversion.

Unofficial sources said that the scientific team yesterday attempted to establish a controlled situation similar to the conditions present on October 6 to see if the phenomena would reappear.

Scientists working with Low on the investigation include Dr. Norman E. Levine of the University of Colo.; Roy Blackmer, Carl Herold and Dr. R.T.H. Collis of Stanford, Dr. Marx Brook of the New Mexico Institute; and Dr. Roger Lhermitte of ESSA.

drilling. b/17/67 UFO probe results blame inversion

Air Force officials this morning said that an investigation into the UFO sightings here October 6 indicated they may have been caused by a combination of smoke and temperature inversions.

The investigation, which culminated with the scrabling of defense aircraft from Oxnard AFB., was triggered by pickups on radar units assigned to Vandenberg.

The investigation was headed by It. Col. Richard Dixon of Vandenberg. (Longon feel)

UFO Sightings Studied By AF

Vandenberg Air Force Base officials today are continuing an investigation into reports of unidentified flying objects in this area Friday night:

Officials as yet have not completed the investigation and as is required by regulation will say only that, "The sighting is under investigation by an Air Force team and the results of the investigation will be made public by the Secretary of the Air Force."

One woman who asked that her name not be used said that about 10:30 Friday night she saw three brightly colored UFOs hovering in the northwest sky. She said that two of them disappeared a short time later.

It was learned yesterday that the Air Delense Command at Oxnard Air Force Base scrambled four F-101B aircraft shortly after midnight Friday in response to a report from this area. There was no official information indicating whether or not the planes made contact and identification.
